## WHITEPAPER

# 01 | ABOUT SMS

We aim to revolutionize the world of cryptocurrency and make it more engaging and entertaining. With a unique approach to meme coin trends, we are working on a groundbreaking project. We are all familiar with the predictions The Simpsons have made about the future—many of which have come true. In our investor-focused project, we aim to transparently showcase how these prophecies unfold.

Our goal is to successfully integrate The Simpsons into the world of cryptocurrency and blockchain. Through this, we aspire to create a revolutionary project that blends humor, predictions, and mystery in the crypto market. The uncanny accuracy of The Simpsons' predictions has sparked curiosity among people. We seek to connect this mystery with the crypto world, allowing investors to observe and speculate on whether the next predictions will come true. In doing so, we intend to infuse the crypto space with humor and entertainment.

We aim to provide a dynamic and secure environment that encourages creativity, enables seamless transactions, and allows individuals to explore, connect, and thrive in the digital asset space. By staying at the forefront of the crypto revolution, we seek to change the way people perceive and engage with cryptocurrencies.

## 02 | THE VISION

We strive to be a leading force in shaping the future of crypto by driving innovation and fostering a strong, inclusive community. Our vision is to make meme coins and blockchain technology accessible to everyone, regardless of their background or expertise. We believe that humor, culture, and creativity can break down barriers and spark meaningful engagement in Web3. By combining entertainment with utility, we aim to empower a new generation of users to explore, learn, and thrive in the decentralized world.

## 03 | PREDICTION

We aim to create a groundbreaking project that brings together the uncanny predictive power of The Simpsons and the cutting-edge world of cryptocurrency and blockchain technology. For over three decades, The Simpsons has intrigued audiences with its surprising accuracy in forecasting real-world events—from political shifts to tech innovations. These predictions have become a global talking point, fueling online debates and viral theories. Our mission is to harness this cultural phenomenon and build an interactive crypto ecosystem that revolves around these iconic predictions. By tokenizing and gamifying these forecasts, we invite users to speculate, invest, and engage in the mystery:

- Will the next Simpsons prediction come true?

Through this fusion of entertainment, speculation, and blockchain, we're not just creating another meme token—we're pioneering a prediction-powered platform where humor meets possibility.

We're not just tapping into a fanbase—we're activating a cultural mystery that millions already follow. By blending the foresight of The Simpsons with the interactivity of Web3, we're creating a project where users aren't just investors—they're detectives, fans, and futurists.

## 04 | EXAMPLES

### COVID-19 & “Murder Hornets”

- Episode: Marge in Chains (1993)
- Prediction: A global flu pandemic from Asia spreads quickly. Also, a box labeled “killer bees” spills open.
- Reality: In 2020, COVID-19 began spreading, and around the same time, news of “murder hornets” in the U.S. made headlines.

1993  
2020

2000

### Donald Trump Becomes President

- Episode: Bart to the Future (2000)
